XACT

The multifunctional and ergonomic education chair Xact comes in two sizes - Xact and Xact Start. This means that it can be used in the whole school, from preschool classes to staff rooms, and it is also perfect as a meeting and conference chair. Practical, flexible and cost-effective.

ENCOURAGES MOVEMENT

Xact is a robust yet lightweight chair which is easy to move around. Choose between many different colours, a laminate, veneer or plastic finish, and whether you want an upholstered seat and back or not. The chair has well thought-out ergonomics and encourages natural movement which means that you feel better and get more done.

DESIGN - KINNARPS STUDIO

The aim of Xact was to design a stylish and, at the same time, a chair with a strong character which fits in many different environments and contexts. Robust practical details with the elegant contours of the back come together to create an overall impression in which aesthetics and functionality go hand in hand. The many choices when it comes to colour and material make it easy to create a personal combination.

Design: Kinnarps Studio

FUNCTIONS & OPTIONS

FOCUS ON DETAIL

Set and adjust. The knobs allow you to easily adjust the chair according to your personal needs. Control the level of resistance and tilt the chair if you want. The knobs are easy to reach and it is quick and smooth to set and adjust the chair according to each individual.

ADJUST THE CHAIR

With the lever you can move the seat quickly and smoothly forwards and backwards and adjust the chair to how it suits you. The lever is therefore easy to reach and easy to use when making personal adjustments.

SAFE SUSPENSION

The frame makes it easy and secure to hang the chair on the table. That way it is easy to clear the floor – for cleaning for example – and there is no risk of the chair falling off. The frame is optional.

XACT START

Xact Start is a completely new chair which is suitable for children from around 6 years up to 13 years. Thanks to the ergonomically well thought-out chair now being available in a smaller version, younger children can also get the same high seat quality as older children and adults.

ADJUSTABLE AND INDEPENDENT

Xact Start is adjustable in height and seat depth, and has a Free Float™ mechanism which means the seat and back move independently of each other.

COMFORTABLE FOOTREST

Xact Start comes in two heights. On the higher chair there is a comfortable footrest to rest feet on. Xact Start is also made with the same materials and colours as the bigger chair – so it is easy to create an inspirational holistic finish throughout the school.
