

N A N O

NANO

The Nano table series can be customised. To conform to your needs. Creating a smooth link between individual and group space. Freestanding or together. Your desk. My personal space. Or our shared bench solution. Created for today's creative working environments. And way of working. Collaborating. Side by side. Or opposite each other. Communicative. And social. Ideal for dialogue. But also for focusing yourself. Its expression is stylish in its simplicity.

CUSTOMISED FUNCTIONALITY

The Nano table series can be customised to suit how and what it will be used for. The desks are linkable, which makes it easy to create more work surfaces beside and opposite one another. Clever cutouts provide practical spaces for cables and with the different attachment options you can equip the tables with the accessories you need, such as monitor arms or screens. The bench system also has the unique Flexrail-system which makes it possible to add accessories without having to use any tools. Nano has a stylish design and offers a variety of different shapes of tabletop and different laminate finishes. You can have both a desk and a bench solution in the same finish – all with a uniform look. The ability to vary the type of work surface makes Nano suitable for activity-based environments where the same table is used by different people in different kinds of situations during the same day. Nano is manufactured in our own production facilities, which gives us control of the entire process. Our manufacturing process takes place in an energy-efficient and environmentally sustainable manner.

THOUGHT-OUT SOLUTIONS

Nano gives you a space-efficient and customised desking solution, offering a variety of functional work surfaces. You now have the opportunity to create a variety of workstyles at the same time – resulting in the creation of a working environment which promotes both dialogue and concentration. Where thoughts become ideas and shared goals are established. You get a creative environment that is adapted to both the individual, the team and the group.

FOR DIALOGUE OR CONCENTRATION

STYLISH EXPRESSION

Nano has a simple and sleek design. There are loads of choices. Different versions of tabletops in ten different laminate colours, combined with square or round legs in black, white or silver. We always focus on the balance between aesthetics and function to help make the tables an essential part of appealing and inspiring working environments.

“Nano desks and bench solutions have a stylish design with pure lines. Our focus with Nano has been to offer a functional workplace which can be customised according to need.”

Per Enskär, International Product Manager Desk and Meetings

NEXT OFFICE™ – ACTIVITY BASED WORKING

Nowadays, with the help of technology, we can work whenever and wherever we like. The need for assigned personal workstations is on the decline and is being replaced by an increasing need for flexible, activity-based environments. Nano is well suited to this type of thinking. Where the same table can be used by different people during one day. For individual workplaces, temporary “drop down” places or project areas. The table layout can be designed to ensure monitor arms, power sockets and network connections are within reach whatever the table is being used for. It is simple to customise for different kinds of needs and roles.

QUICK FACTS DESKS

- Choose between four different leg models in white, black or silver:
 - square leg with adjustable height
 - square leg with fixed height
 - round with adjustable height
 - round with fixed height
- The tops are available in some 30 different shapes. Read more on page 22.
- Ten laminate finishes.
- Sliding tabletop and easy cable management.
- Cable tray (silver, black, white) is height adjustable and can be opened from both sides.
- Linkable for flexible work surfaces and placement.
- Complement with screens.

DESKS - FUNCTIONALITY FOR YOU

The desks offer many smart benefits. The various tabletop and underframe options make them easy to install and simple to combine with other furniture. The legs can be adjusted so that you achieve the optimum height for sedentary work. There are lots of practical add-ons, for example screens for creating your own personal space. A sliding top, cutouts for cables and cable trays hide cables and sockets to give an uncluttered impression. Smart tabletop cutouts mean that you can fit the tables with the accessories you need such as monitor arms, screens or power sockets. You can choose between using Nano freestanding or linking several desks together. Combine it with one of our ergonomic task chairs to create the ideal workplace for you.

With smart connecting leg frames you can link desks and tabletops together to create more space and new functionality. You can create whatever set up the work team requires and can also divide up the work surface with fabric screens.

**EASY TO CUSTOMISE**

Nano gives you a flexible and space-efficient solution. Well suited to today's working environments, where the number of workplaces required often shifts from week to week or from day to day. Therefore the tables are easy to customise to work with more or fewer employees. The Flexrail system means you can equip the bench solution with the accessories required for the task at hand. They are easy to remove later to create more space. You can also move screens, dividers and monitor arms sideways with Flexrail to create more work surface.

BENCH SOLUTIONS - MANY TABLES IN ONE

The Nano bench solution is fundamentally about functionality. With smart tabletop cutouts you can fit the tables with accessories, such as monitor arms, screens, dividers and power sockets. Everything is within reach and the tables give a clean impression where nothing gets in the way. Different cable management options give you uncluttered surfaces. And there are many ways of going online, suitable for today's mobile technology. Screens can create a personal space for work requiring concentration. Without screens the team has a space for project meetings or teamwork. Practical extension tops create extra surfaces or a temporary workplace. Another advantage with the height adjustable legs is that you can customise the working height of the table according to your own needs. All this means creating optimal ergonomics for sedentary work.

QUICK FACTS BENCH SOLUTION

- Choose between three different leg models in white, black or silver:
 - square leg with fixed height
 - round with fixed height
 - square leg with adjustable height
- The tabletops are 700 mm or 800 mm deep. Read more on page 23.
- Ten laminate finishes.
- Sliding tabletop and easy cable management.
- Extension tops create extra space.
- Complement with screens. Available in ten different colours or frosted white acrylic.
- Tabletop cutouts mean you can fit the tables with accessories, such as screens, monitor arms. It also offer practical cable management.
- There is also Flexrail system for flexible functionality.

Height adjustable legs (in silver, black or white) mean you can customise the height of the tabletop (650-850 mm) to get the correct working height for sedentary work.

This practical wireless charging unit means you can charge your mobile phone by placing it on the table.

FUNCTIONS & OPTIONS

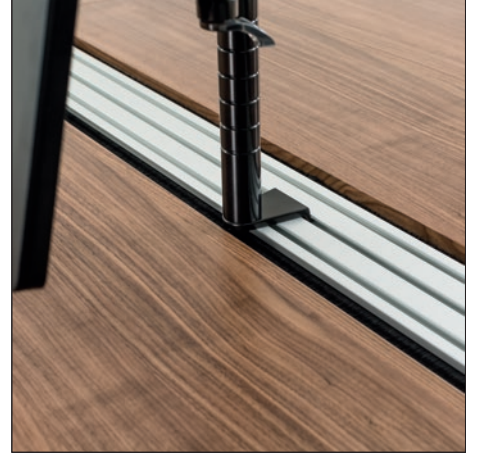

OVAL TABLETOP CUTOUT

Using the tabletop cutout you can fit the table with accessories such as screens, monitor arms and deal with cables practically. You can have up to three oval tabletop cutouts per tabletop with edge cutouts and a swivelling plastic cover. These are placed in the corner or the middle of the tabletop. The cover can be opened and closed to access the fasteners for the accessories.

TABLETOP CUTOUT WITH LIPPING

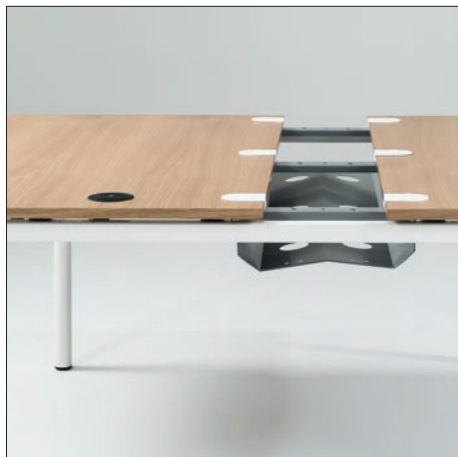

This scallop cutout (only for bench solution) is placed in the centre of the tabletop. You can use it to attach accessories e.g. screens or monitor arms. This also provides functional cable management to keep the work surface uncluttered. The scallop cutout has a lipping which matches the colour of the tabletop for a uniform look.

FLEXRAIL™

The unique Flexrail system gives the bench solution an integrated functionality. It allows you to have all the options you need at the same time. You can quickly add and remove, with a simple hand motion, accessories, for example screens or monitor arms without having to use tools. One option is an easily accessible power socket where you can connect your computer and any other technology you need. You can also cover Flexrail with a cover to create an elegant surface suitable for meetings.

SLIDING TOP

A sliding tabletop (adjustable 130 mm depth) gives a clean finish as cables and sockets can be easily hidden. Choose ball-bearing slides for more control and quick lock for easy use.

CABLE TRAY DESK

The cable tray means you can store all cables and power sockets. Matches the colour of the legs (silver, black, white). Can be adjusted to two height settings. Can also be opened from two sides for easy access to cables. High edges hold the cables in place when opening.

CABLE TRAY BENCH SOLUTION

Spacious, adjustable cable tray (in silver) where you can store all cables and power sockets. Can be hooked off on one or both sides for easy access.

EXTENSION TOP

The bench solution has a practical extension top. It creates extra space, an essential work surface or a temporary workplace. Fitted to the outer leg assembly. Can also be fitted at a later stage.

LEGS - ADJUSTABLE HEIGHT

Square or round legs (in silver, black, white) with adjustable height. The table's adjustable height is 650-850 mm. The round adjustable legs only fit the desk.

LEGS - FIXED HEIGHT

Square or round legs (in silver, black, white) with fixed height, 740 mm. Suitable for desks and bench solutions.

FUNCTIONS & OPTIONS

PANELS

Well-designed panels in veneer, laminate or metal which match the finish of the legs and tabletop. Fitted under the tabletop.

CONNECTING LEG FRAME BENCH SOLUTION

Connecting leg frame for bench solution (standard when four or more tables are linked). For easy cable management a spacious vertical cable tidy is included. Matches the colour of the legs (silver, black, white).

CONNECTING LEG FRAME DESK

Connecting leg frame for desks which is used to link together 800 mm deep tables lengthwise. Available in silver, black, white.

CABLE TIDY

Functional cable tidy made of steel which you can fasten with a magnet on any of the table legs. Matches the colour of the legs (silver, black, white). Can also be fitted at a later stage.

DESKTOP SCREEN INDUS

The Indus desktop screen is made of fabric and can be used both on desks and bench solutions. Available in ten colours in the Delta fabric. You choose the fastener depending on where you would like to place the screen and how.

DIVIDER INDUS

Desktop divider with the same design as the desktop screen. Fitted with the fastener which suits all tabletop thicknesses (19-25 mm). Ideal for the bench solution to easily create customised and flexible work surfaces.

MONITOR ARM

Flexible and adjustable arm (silver, white) for flat computer monitors. It can be twisted and rotated to make the best possible use of the monitor. An iPad holder can also be added to the arm.

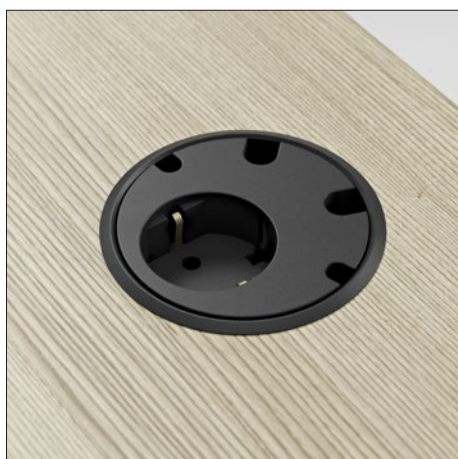

POWER BOX

This powerbox has a socket for power, a network connection and a USB port close to hand. It also has a practical cable trap.

POWER SOCKET

Silver power socket with two power outlets, a network socket and USB port. Fitted to Flexrail or round the edge of the tabletop.

CABLE PORT WITH POWER SOCKET

Great functionality on a small surface. Cable port with a power socket and holes for four cables.

HOLDER/CHARGER MOBILE TELEPHONE

This practical wireless charging unit (placed in a round tabletop cutout) means you can charge your mobile phone by placing it on the unit.
