MENTO

A genius in diversity with a guaranteed feeling of ease - Mento task chairs satisfy virtually every individual perception of styling. Whether the backrest is a light and breathable mesh or ergonomically upholstered, Mento stands out with its exceptional variety of combinations. The range of colours for the mesh back variant and the choice of fabrics for the upholstered version are almost boundless.

That's not all. From an ergonomic point of view, Mento assures a seating quality equal to the tried and tested Drabert Philosophy of Ergonomics at the highest level. Relax-o-flex® cushioning, a vertical, specially shaped plastic foam insert in the backrest, stimulates and animates certain nerves in the spinal region whilst sitting, increasing the feeling of wellbeing. Economical, yet with first rate quality for a new start in this brand.

DEISIG DESIGN

The design studio Deisig Design develops innovative furniture concepts based on ergonomic research and advanced knowledge of new ways of working. When the studio designed the Mento task chair, they based it on the complex interaction between shape and function to create something simple and unpretentious.

“Based on the complex interaction between shape and function we have created something simple and unpretentious”.
