

FENIX

Prestigious trendiness - with its filigree expression of design and exceptional quality of materials, the Fenix task chair and conference chairs are prominent trendsetters for challenging interiors. The softly-shaped, slender upholstery profile, which lends the armchair its particular lightness, are characteristic.

Fully upholstered - the armrests included - Fenix combines the comfort of an armchair with the demands made on a task chair. The flex mechanism provides dynamism in the backrest. Its counterpressure is adjustable to match the bodyweight of the user and lockable in the forward position. Fenix task chairs are available in two heights, also obtainable without castors for use in meeting rooms. The version with the high back is additionally equipped with a headrest.

WOLFGANG C.R. MEZGER

Wolfgang C.R. Mezger's design philosophy involves finding a connection between functionality and the poetic. With its flowing lines and sculptural form, Fenix makes a design statement in any room, whether it is a manager's room or a conference room. The function is a part of the design and enhances its strong impression in the exact design.

"My design philosophy involves finding a connection between functionality and the poetic."

Wolfgang C.R. Mezger
